
Birmingham Green Party: Our priorities

Our vision is for a cleaner, fairer, more inclusive city for the common good. Our candidates would work towards this by striving for:

A cleaner city – streets free from litter; an end to waste collection charges; improved waste management policies (recycling and reusing as much waste as possible); investment in green spaces, urban parks and eco-friendly building design.

A fairer city – undeveloped and derelict land to be brought back into public use for Birmingham citizens; reduced energy costs through investment in home energy retrofit programmes and a Council owned renewable energy company; safer roads for cyclists; improved children's social care and child protection services; investment in adult social care provision for people with specific needs; freedom for people to protest peacefully.

A more inclusive city – a standard education for all our children in consistently well run schools, with an emphasis on effective governance; a more cohesive city in which minority communities do not feel alienated by divisive media and government policy agendas; an end to the cuts and more investment in community centres, arts initiatives, leisure facilities, libraries and allotments.
